

HORN ISLAND

Barrier Island off the Mississippi Gulf Coast

96 +/- acres spanning from North Shore to South Shore.... rare, privately owned property held for almost 65 years!

Horn Island offers a strategic position for energy firms, marine operations, eco development, or long term investment holdings.

Yet its untouched beauty and ecological significance also present a unique opportunity for philanthropists, conservationists, or foundations seeking to preserve a piece of America's natural heritage.

Whether you're looking for a private staging location, exclusive coastal buffer zone, or a legacy asset with long range up-side; this property delivers.

Are you ready to carry this legacy forward?
